

## 02/16/10: Update from Brad Mark, SRFD

The crews are burning the last 170 piles. No wind today so it will be rough on them. Hopefully it will pick up this afternoon. Attached is a map showing what is left to do as of Friday (2/12) last week.

Captain Mark  
San Rafael Fire Department  
415-485-3309

As you can see in the photos attached wet fuels are miserable. Sometimes artificial air is needed just to keep the fires burning.
